

Scrap Basket Mystery

Step 12

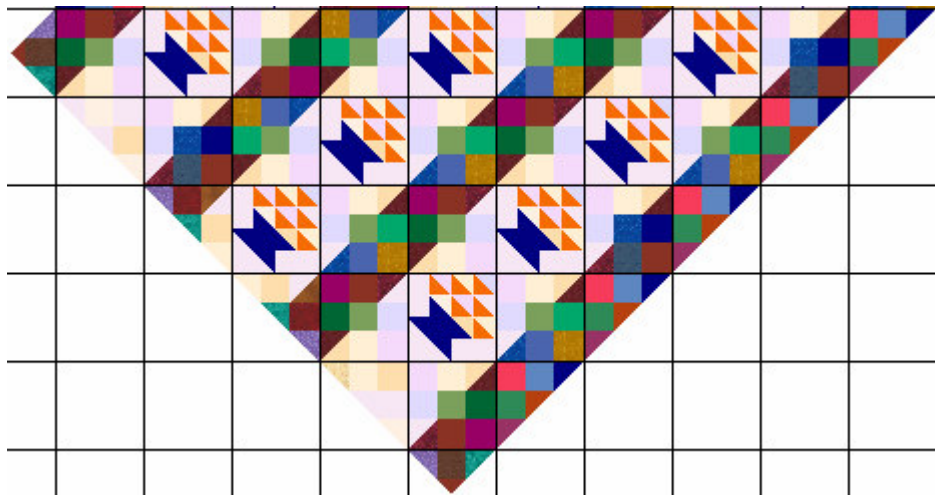

The big Reveal!

Get together all those blocks you have made. There should be 33 split 9-patch (S9P) blocks, 16 basket blocks, and a bunch of pesky triangle pieces. The quilt is set on point, but to put it together you just assemble rows as shown with triangles on the ends and it will all come together. It is a lot like making the triangle units with the wing pieces, only on a bigger scale.

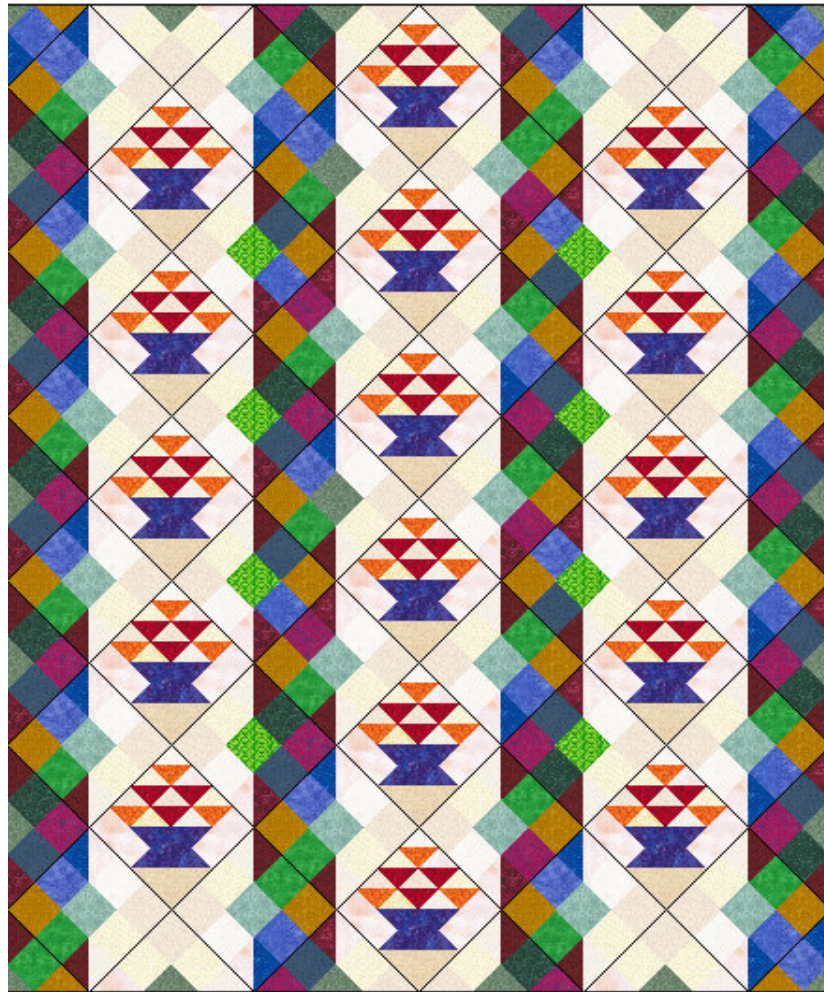

Once you have the top half together, do the same thing in reverse to make the lower half and sew the two halves together with one long seam.

~~~~~ Tā-Dā! ~~~~~

Give yourself a pat on the back.

I need to take a couple of weeks off but I will be back with some border ideas soon.
